

How to Calculate Distance Between Two or More Points on a Map

Tutorial No. **19**

Overview

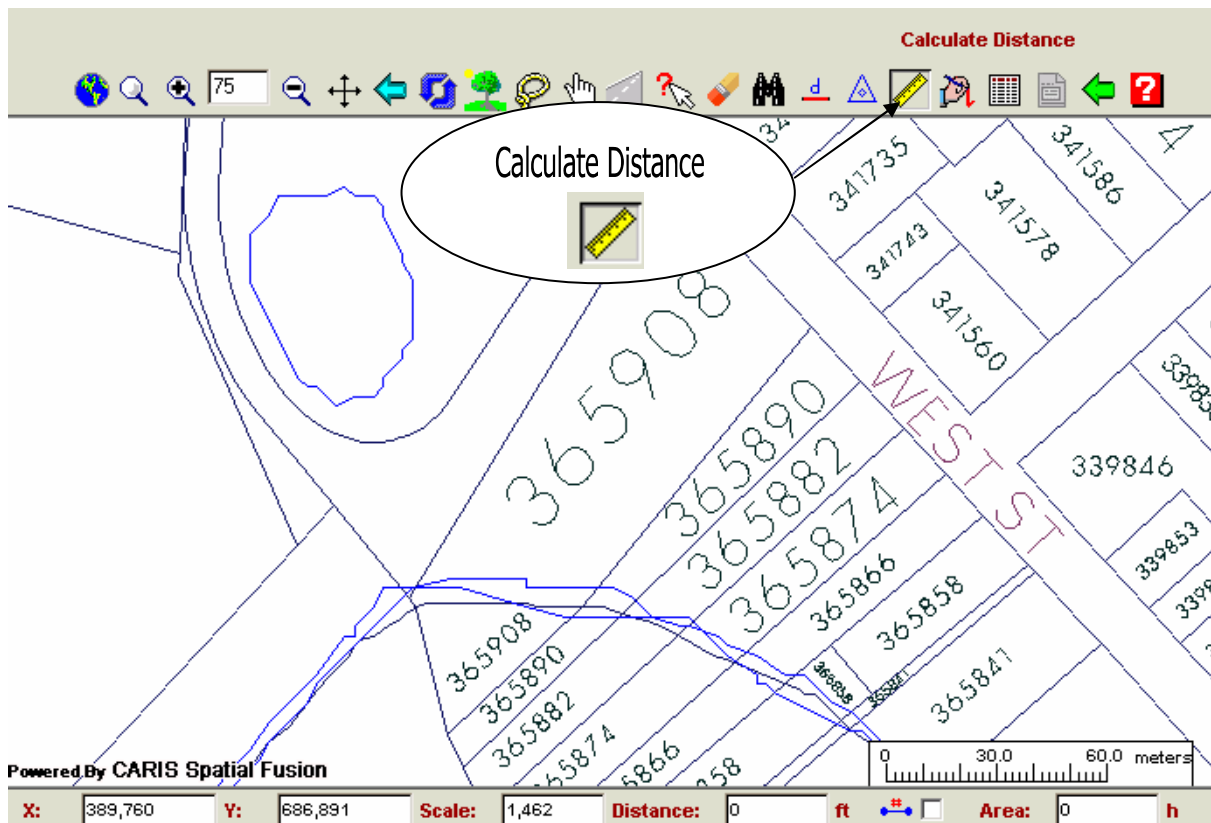

This tutorial is a continuation of tutorial 12. The goal of this tutorial is to learn how to measure distance between two points.

In this tutorial, you will:	Cost
- View Map window	\$2.25
- Calculate Distance	\$0

At the end of this tutorial, you will be able to measure distance between points on a map.

View the Map Window

1. Follow the steps outlined in Tutorial 12: *View the Map Window*

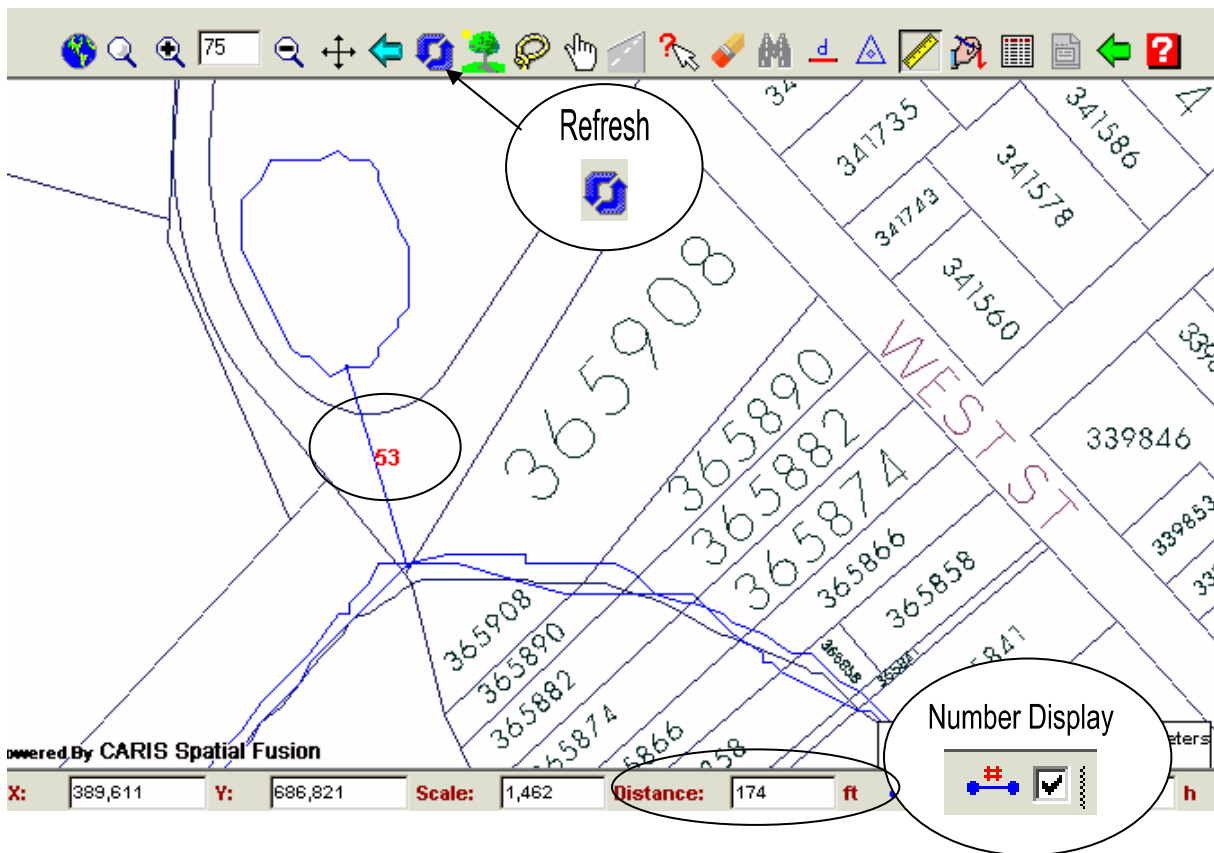

2. Locate the [*Calculate Distance*] button the **Map window**. You will notice that the icon is a picture of a ruler.

Calculate distance between two or more points on the map

3. Click on the *Number Display* check box at the bottom of the **Main map**.
4. Click on the bottom left-corner of the property line of parcel 365908.
5. Click on the edge of Governor's Pond

The *Number Display* tool displays the distance as 53 meters. The *Distance* textbox displays the distance as 174 feet.

6. To clear the line you created, click on the [*Refresh*] button on the **Toolbar**.
